drysign

Digital signatures get deals done: secure, sustainable sign-off in seconds.

WHAT IT IS

DrySign is Exela's digital signature platform. With DrySign, you'll send out documents and obtain signatures instantly--sans paper--making sign-off simple, sustainable, super-fast, and secure. Signed documents are securely stored and searchable.

HOW WE DO IT

› Upload documents from any device (including from cloud-based storage).

› Highlight where to sign and anything else that needs attention.

› Invite signatories in whatever order you choose—to download, review, and sign.

› Track status of signatures and send reminders in real time.

› Store documents securely, allowing designated users to search, access, and download.

WHY YOU NEED IT

› **No paper. No printer. No problem.**
  DrySign permits end-to-end paper-free documentation: draft, discuss, execute, and administer your contracts anywhere,
  anytime, from any device.

› **Signatures at the speed of light.**
  DrySign enables contract execution in real time, no travel-time required.

› **Rethink the cost of paper and ink.**
  DrySign takes paper and ink out of the closing equation. Not to mention postage. And printers. And toner. And printer maintenance. And all the wait time. And waste.

BENEFITS

› **Empowers you to go paperless**

› **Saves printing and postal costs**

› **Improves the speed of contract/agreement execution**

› **Self-sign documents you upload**

› **Multiple signatories can be reached at once with group signing**

Embracing complexity. Delivering simplicity.℠
